

# Becoming a Git Wizard

Pearl Hacks

D. Ben Knoble

UNC Chapel Hill

23 February 2019

## Required setup

1. `git`
2. GitHub account
3. GitHub Desktop [be sure to sign in with GitHub!]
4. Fork and clone the starter code

Do what?

- `fork` Deep-copy a repository/project from another GitHub account to your GitHub account
- `clone` Deep-copy a repository/project from one location to another (e.g., from GitHub to your computer)
